Sep 04 2020 **Chemical Technology** Feb 09 2021 Chemical Technology is based on lectures the author gave at the Technische Hochschule of Karlsruhe and at the University of Freiburg. Part 1 of this book deals with chemical technology and describes subjects dealing with apparatus, unit operations, and chemical economics. The text reviews industrial chemical reactions, raw materials preparation for reaction, thermal and catalytic processes, and a history of chemical technology. This part also addresses transportation, storage of raw materials, and the design and construction of a chemical factory. Part 2 concerns special chemical technology, including topics such as raw material upgrading; processing of products in the chemical industry; and unit processes application toward consumer goods production. This part reviews materials sourcing from animals, minerals, and vegetables, such as processing of products from living organisms, the recovery of sugar, starch, and other carbohydrates. The book also reviews products of the chemical industry including

low-molecular weight consumer goods, detergents, aromas, explosives, plastics, elastomers, synthetic leather, textile, and some building materials. Chemistry students, chemical and process technology students, and mechanical engineering students with interest in chemistry will find this book valuable.

Cogeneration & Small Power Production Manual Dec 19 2021 This 5th-edition manual can be used by the manager as well as the engineer or attorney to understand rate structure and regulations, legal rights of cogenerators, engineering and cogeneration selection processes, and operational considerations. It discusses the financial feasibility of cogeneration with methods for evaluating economic performance, and energy savings and details the steps power contracting and procurement. The authors include a helpful analysis of today's competitive power marketplace as well as guidelines for transmission access, pricing, and terms.
